

SYSTEMS FOR GENERATING RADIOLOGY REPORTS

ABSTRACT OF THE DISCLOSURE

A method of generating a patient report, comprising: presenting an operator with an on screen menu of standardized types of reports; having the operator select a standardized type of report from the on screen menu of standardized types of reports; presenting the operator with an on screen organ list corresponding to the selected standardized type of report; for each organ, presenting the operator with a menu of standard medical descriptions corresponding to the organ; having the operator determine a medical description corresponding to each organ; and outputting a patient report describing the medical description of each organ.
